As the world leader in rodent control technology, Bell Laboratories continues to provide leadership and stewardship for the rodent control segment of the pest control industry. Our focus is on quality, functionality and innovation.

Whether it is the development and production of innovative rodent control products, being at the forefront of regulatory issues, or developing new revenue opportunities for PMPs (such as providing rodent service for certified organic facilities using Terad3Ag or residential baiting with the T1 Mouse), Bell is committed to supporting the pest control industry.

**PROTECTA TAMPER-RESISTANT BAIT STATIONS**
From the toughest to most discreet baiting requirements, Bell offers PMPs a choice of versatile, tamper-resistant bait stations and anchoring systems to fit any situation.

**UNIQUE RODENTICIDE BAIT FORMULATIONS**
Bell Laboratories’ complete line of rodenticides represents the widest range of rodent baits available anywhere. Bell’s rodenticides contain only the high quality inert ingredients for maximum results. Bell’s overall palatability and efficacy are proven in both laboratory and field settings.

**TRAPPER GLUE AND MECHANICAL TRAPS**
Bell has applied its vast knowledge of rodent behavior and engineering savvy into the development of an array of mechanical and adhesive trapping alternatives. Bell’s glue formulations are the result of substantial research and testing to determine the ideal combination of immediate grip and stretchable hold, the two factors needed for the highest possible capture rate.

**TALPIRID MOLE BAIT AND MOLE TRAP**
TALPIRID Mole Bait is a one-of-a-kind product that was developed after years of groundbreaking research. It is the first mole bait of its type designed, developed and scientifically proven to kill moles.

TALPIRID Mole Trap incorporates the latest in mole trap technology. Built to withstand any soil type, it is the ideal complement to a complete TALPIRID program.

**MANUFACTURING FACILITY**
Bell is a vertically integrated manufacturing company. All of Bell’s products are designed, tested and manufactured in its modern facility in Madison, Wis., which houses its manufacturing operation, offices, and biological and chemical testing laboratories.

**ENVIRONMENTAL STEWARDSHIP**
Bell continues to work with conservation groups and government agencies around the world to rid ecosystems of invasive species and restore the balance of nature.

**PRODUCT** | **PURPOSE** | **FEATURES**
---|---|---
PROTECTA® EVO EXPRESS® | Tamper-resistant rat station comes pre-installed with concrete weight and includes a single lock mechanism and removable tray for simple & speedy servicing. | • Securely and professionally anchors bait station with internal weight • Versatile; can hold 2 T-Rex rat traps, 2 Mini-Rex mouse traps or 8 - 1 oz. BLOX • Side-open with single lock

PROTECTA® EVO AMBUSH® | Low-profile station that accommodates the T-Rex rat snap trap for times when trapping is a necessary part of the IPM program. | • Single lock and removable tray for fast and easy servicing • Compatible with the Sidekick Load-N-Lock system

PROTECTA® EVO CIRCUIT® | Ideal for sensitive accounts, the Circuit includes side connectors that, when attached, make the station appear as an electrical box. | • Side connectors make station simulate an electrical box • Single lock and removable tray for fast and easy servicing • Can be used horizontally or vertically

PROTECTA® EVO MOUSE® | Versatile mouse station designed with a single locking mechanism to provide quick servicing, it storage capabilities. | • Fits in corners and tight spaces • Holds 2 – 1 oz. BLOX • Bait rods included for soft bait • Quick servicing features

PROTECTA® EVO LANDSCAPE® | Versatile mouse station designed with a single locking mechanism to provide quick servicing, it storage capabilities. | • Fits in corners and tight spaces • Holds 2 – 1 oz. BLOX • Bait rods included for soft bait • Quick servicing features

EVO WEIGHTED LANDSCAPE® | Tamper-resistant rat station designed to blend in with outdoor landscape. | • Tamper-resistant, opens sideways with EVO key • Full-size insert tray available • Holds 8 – 1 oz. BLOX and a T-Rex rat trap

PROTECTA® EVO EDGE® | A versatile station that is fast to open and service. Working well as both a bait station and a trapping station, the EVO Edge is easy to use and opens and locks quickly with Bell's EVO key. | • Versatile configuration: Fits: 8 x 1 oz Bait Blox (2 per rod) 2 x TRAPPER Mini-Rex Mouse Traps 1 TRAPPER T-Rex Rat Trap • Locking bait rods won’t fall out when replacing bait

PROTECTA® EVO TUNNEL® | Can be used indoors or outdoors, and can be secured to fences or pipes via cable ties in both the vertical and horizontal position. A low and discreet profile, the EVO TUNNEL provides tamper-resistant coverage of a variety of rat and mouse traps. | • 2 TRAPPER T-Rex Traps • 2 TRAPPER Mini-Rex Traps • 2 TRAPPER Max glue boards • 2 TRAPPER Mouse Glue Trays

PROTECTA® LP | Tamper-resistant rat station designed for inside and outside buildings. | • Fits along walls & corners • Horizontal & vertical securing rods • Available in two colors

PROTECTA® SIDEKICK® | Economical way to upgrade from using non-tamper-resistant bait stations to the security and high quality of a tamper-resistant bait station. | • Tamper-resistant, opens sideways with metal 2-prong key • Holds 8 – 1 oz. BLOX and a T-Rex rat trap • Integrated service card slot

IQ™ products integrate proprietary BST sensors that turn some of Bell’s most popular products into powerful 24/7 rodent data gathering machines. Using Bell Sensing Technology, PMP’s will now be able to know everything about the rodent activity occurring at their accounts.

**NEW**

**iQ PRODUCTS**

**POWERED BY**

**BELL SENSING TECHNOLOGIES™**

**PRODUCT LINE UP**

- **Define rules**
- **Review data**
- **Monitor results**
- **Communicate with customer**

**INTEGRATED SENSORS**

- Record activity
- Generates time stamps
- Know when & where rodents are traveling

**OPTIMIZED MOBILE APP**

- Collects data from sensors
- Interprets results by filtering out noise
- Fast recordkeeping

**CUSTOMIZED PORTAL**

- Define service rules
- Review data
- Monitor results
- Communicate with customer

For information about upgrading your rodent control service, contact your Pest Control Distributor or visit www.bellsensing.com
Express® iQ™ trays have fully integrated sensors that collect rodent activity at the account. When PMPs are conducting a service, the sensors from the tray communicate rodent activity via Bluetooth® technology to the Bell Sensing App.

SEAMLESS INTEGRATION

Rodent activity and entry points into accounts are recorded, helping PMPs answer the question of why rodent activity is spiking in certain places, at certain times.

TRACK RODENT ACTIVITY

No need for tools, nuts and bolts, or expensive gateway equipment. The Express® iQ™ tray can be placed into both new existing EVO® Express® stations. To install, simply remove existing tray and add iQ™ tray, follow activation set-up instructions and begin sensing.

EASY INSTALLATION

To learn more, visit bellsensing.com
NEW

TRAPPER® 24/7 iQ

NEVER CHECK AN EMPTY TRAP AGAIN
Once PMPs are on-site, they will know which traps need to be serviced, saving time and limiting disturbances at their customer.

IDENTIFY RODENT ENTRY POINTS
Helps PMPs to answer the question of why rodent activity is spiking in certain places, at certain times.

ROBUST AND SLEEK
The base and top are made out of a strong polycarbonate material that holds up to active environments and won’t rust.

NEW

TRAPPER

T-Rex iQ

NEVER CHECK AN EMPTY TRAP AGAIN

Once PMPs are on-site, they will know which traps need to be serviced, saving time and limiting disturbances at their customer.

PLACE TRAPS ANYWHERE

Technicians can now place T-REX® iQ traps in hard to reach locations and know if there is a rodent capture, without having to get a ladder or safety equipment.

SUPERIOR RAT TRAP

T-REX® iQ™ has same ferocious trapping power that T-REX® traps are known for, with its patented interlocking teeth making rat escapes virtually impossible.

POWERED BY

Bell SENSING TECHNOLOGIES™

NEW

Protecta® EVO® AMBUSH® iQ™

SEAMLESS INTEGRATION

Ambush® iQ™ trays have fully integrated sensors that collect rodent activity at the account. When PMPs are conducting a service, the sensors from the tray communicate rodent activity via Bluetooth® technology to the Bell Sensing App.

TRACK RODENT ACTIVITY

Rodent activity and entry points into accounts are recorded, helping PMPs answer the question of why rodent activity is spiking in certain places, at certain times.

EASY INSTALLATION

No need for tools, nuts and bolts, or expensive gateway equipment. The Ambush® iQ™ tray can be placed into both new and existing EVO® Ambush® stations. To install, simply remove existing tray and add iQ™ tray. Follow activation set-up instructions and begin sensing.

### PROTECTA® EVO EXPRESS

- Weighted station with removable tray for easy cleaning
- Single locking mechanism for quick servicing
- Ramped entry keeps kids and non-target animals from reaching bait/traps
- Can hold 2 T-Rex rat traps, 2 Mini-Rex mouse traps or 4 vertical bait rods
- Dog & child tamper-resistant

**PACKAGING:**
Each EVO Express includes station, brick, tray, securing rods & service card. Ships in pallet quantities. Available in black and gray

<table>

Available in iQ version

### PROTECTA® EVO AMBUSH

- Single locking mechanism for quick servicing
- Removable tray for easy cleaning
- Low-profile but accommodates TRAPPER T-Rex Rat Trap
- Compatible with Sidekick Load-N-Lock system
- Dog & child tamper-resistant

**PACKAGING:**
6 stations per case with bait securing rods, tray and service card

### PROTECTA® EVO CIRCUIT

- Built-in disguise includes connectors to make station simulate an electrical box; great for sensitive accounts
- Can be used horizontally or vertically
- Single locking mechanism for quick servicing
- Removable tray for easy cleaning
- Dog & child tamper-resistant

**PACKAGING:**
6 stations per case with plastic connectors, bait securing rods (horizontal & vertical), tray and service card

Available in iQ version
**PROTECTA® EVO MOUSE**

- Single locking mechanism for quick servicing
- Holds twice as many BLOX as RTU so more mice can feed from station
- Works with either BLOX bait or Soft Bait
- Fits in corners, under pallets and along rodent runways
- Internal teeth clamp on soft bait paper to minimize paper displacement

**PACKAGING:**
12 stations per carton with bait securing rods and service labels, 12 cartons per case

**PROTECTA® EVO TUNNEL**

- Tamper Resistant tunnel with EVO key
- Securely holds either 2 T-REX® or 2 T-REX® iQ™ traps in each tunnel
- Economical way to protect traps and non-targets at accounts, without having to buy a bait station
- Tunnels are stackable for easy handling
- Can be secured to fences or pipes via cable ties
- The T-REX rat trap when used with EVO Tunnel meets NAWAC animal welfare standards
- Low, long profile for discreet placement
- Indoor or outdoor use
- EVO Tunnel can also be used for: Mini-Rex™ mouse traps and Trapper® Max glue boards

PACKAGING: 6 stations per case

w/ Roach Tablets
CHOOSING THE RIGHT BAIT

The level of rodent activity determines the appropriate bait for the job. It may be a new account with a heavy infestation, an existing account with persistent rodent activity, or a preventative program set up to monitor and keep rodents out. Proper selection and application of these baits will determine the success of the Rodent Control Program.

**CONTRAC®**

**ACTIVE INGREDIENTS:** Bromadiolone

**TYPE:** Second generation anticoagulant

**ANTIDOTE**: Vitamin K1 treatment

**GENERAL ATTRIBUTES:**
- Rodents can ingest a toxic dose in a single feeding
- Rodents may continue to consume the bait even after ingesting a toxic dose

**WHEN TO USE:**
- For heavy infestations where there is strong food competition
- To control persistent infestations
- For occasional invaders to ensure they ingest a lethal dose in a single feeding

**FINAL®**

**ACTIVE INGREDIENTS:** Brodifacoum

**TYPE:** Second generation anticoagulant

**ANTIDOTE**: Vitamin K1 treatment

**GENERAL ATTRIBUTES:**
- Rodents can ingest a lethal dose in a single feeding
- Rodents may continue to consume the bait even after ingesting a toxic dose
- Higher toxicity than CONTRAC® baits

**WHEN TO USE:**
- For heavy infestations where there is strong food competition
- To control persistent infestations
**FASTRAC®**
**BLOX, PELLETED & SOFT BAIT**

**ACTIVE INGREDIENTS:**
- BROMETHALIN

**TYPE:** Acute

**ANTIDOTE**: There is no direct antidote, however there are treatment programs available for sub-lethal ingestions

**GENERAL ATTRIBUTES:**
- Kills rats and mice in 2 or more days after consuming a toxic dose
- Bait quantity may be about one-third that used with anticoagulants

**WHEN TO USE:**
- For heavy infestations where there is strong food competition
- To control persistent infestations

---

**DITRAC®**
**BLOX, CAKE & TRACKING POWDER**

**ACTIVE INGREDIENTS:**
- DIPHACINONE

**TYPE:** First generation anticoagulant

**ANTIDOTE**: Vitamin K1 treatment

**GENERAL ATTRIBUTES:**
- Multiple feedings typically required for the anticoagulant to be effective
- Generally more bait needs to be consumed to reach a toxic dose
- Less toxic than second generation products

**WHEN TO USE:**
- Great for maintaining control once population is restrained
- For monitoring any new activity

---

**TERAD3**
**TERAD3 AG**
**BLOX**

**ACTIVE INGREDIENTS:**
- DIPHACINONE

**TYPE:** First generation anticoagulant

**ANTIDOTE**: Vitamin K1 treatment

**GENERAL ATTRIBUTES:**
- Multiple feedings typically required for the anticoagulant to be effective
- Generally more bait needs to be consumed to reach a toxic dose
- Less toxic than second generation products

**WHEN TO USE:**
- Great for maintaining control once population is restrained

---

**ZP®**
**OATS, PELLETS & POWDER**

**ACTIVE INGREDIENTS:**
- DIPHACINONE

**TYPE:** Acute

**ANTIDOTE**: There is no direct antidote, however there are treatment programs available for sub-lethal ingestions

**GENERAL ATTRIBUTES:**
- Multiple feedings typically required for the anticoagulant to be effective
- Generally more bait needs to be consumed to reach a toxic dose
- Less toxic than second generation products

**WHEN TO USE:**
- Great for maintaining control once population is restrained
- For monitoring any new activity
