## SECTION 4. FIRST AID MEASURES

### Description of first aid measures

**Ingestion:** Not applicable

**Inhalation:** Not applicable

**Eye contact:** Not applicable

**Skin contact:** Not applicable

**Most important symptoms and effects, both acute and delayed:** Not applicable

**Advice to physician:** Not applicable

**Advice to Veterinarian:** Not applicable

### Description of first aid measures for battery:

**Ingestion:** Swallowing may lead to serious injury or death in as little as 2 hours due to chemical burns and potential perforation of the esophagus. **Immediately see doctor; have doctor phone 800-498-8666.** Do not induce vomiting or give food or drink.

**Inhalation:** Provide fresh air and seek medical attention.

**Skin Contact:** Remove contaminated clothing and wash skin with soap and water.

**Eye Contact:** Immediately flush eyes thoroughly with water for at least 15 minutes, lifting upper and lower lids, until no evidence of the chemical remains. Seek medical attention.

**Note:** Carbon black is listed as a possible carcinogen by International Agency for Research on Cancer (IARC).

## SECTION 5. FIRE-FIGHTING MEASURES

### Extinguishing media

**Suitable Extinguishing Media:** water, foam or inert gas. Because the product contains a lithium battery, flood area with water or smother with a Class D fire extinguishant appropriate for lithium metal, such as Lith-X. Water may not extinguish burning batteries but will cool the adjacent batteries and control the spread of fire. Burning batteries will burn themselves out. Virtually all fires involving lithium batteries can be controlled by flooding with water.

**Unsuitable Extinguishing Media:** None known.

The battery may react with water and form hydrogen gas. In a confined space, hydrogen gas can form an explosive mixture. In this situation, smothering agents are recommended. A smothering agent will extinguish burning lithium batteries.

**Special hazards arising from the mixture:** High temperature decomposition or burning in air can result in the formation of toxic gases, which may include carbon monoxide.

**Advice for firefighters:** Wear protective clothing and self-contained breathing apparatus. Burning lithium manganese dioxide batteries produce toxic and corrosive lithium hydroxide fumes.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions, protective equipment and emergency procedures:** None. Non-Toxic

**Environmental precautions:** None. Non-Toxic

### Methods and materials for containment and cleaning up

**For Containment:** None. Non-Toxic

**For Cleaning Up:** None. Non-Toxic

**Reference to other sections:** Refer to Sections 7, 8 & 13 for further details of personal precautions, personal protective equipment and disposal considerations.

### If the battery is found to be leaking:

**Ventilation Requirements:** Room ventilation may be required in areas where there are open or leaking batteries.

**Respiratory Protection:** Avoid exposure to electrolyte fumes from open or leaking batteries.

**Eye Protection:** Wear safety glasses with side shields if handling an open or leaking battery.

**Gloves:** Use neoprene or natural rubber gloves if handling an open or leaking battery.

Battery materials should be collected in a leak-proof container.

## SECTION 7. HANDLING AND STORAGE

**Precautions for safe handling:** Do not use near heat sources, open flame, or hot surfaces. Non-Toxic.

For battery: The battery should not be opened or burned. Exposure to the ingredients contained within or their combustion products could be harmful.

**Conditions for safe storage, including any incompatibilities:** None.
