THE WORLD LEADER IN RODENT CONTROL TECHNOLOGY®

## SUPERIOR PRODUCTS FROM THE WORLD LEADER IN RODENT CONTROL

As the world leader in rodent control technology, Bell Laboratories continues to provide leadership and stewardship for the rodent control segment of the pest control industry. Our focus is on quality, functionality and innovation.

Whether it is the development and production of innovative rodent control products, being at the forefront of regulatory issues, or developing new revenue opportunities for PMPs (such as providing rodent service for certified organic facilities using Terad<sup>3</sup>® Ag or residential baiting with the T1 Mouse™), Bell is committed to supporting the pest control industry.

### PROTECTA TAMPER-RESISTANT BAIT STATIONS

From the toughest to most discreet baiting requirements, Bell offers PMPs a choice of versatile, tamper-resistant bait stations and anchoring systems to fit any situation.

### UNIQUE RODENTICIDE BAIT FORMULATIONS

Bell Laboratories' complete line of rodenticides represents the widest range of rodent baits available anywhere. Bell's rodenticides contain only the high quality inert ingredients for maximum results. Bell's overall palatability and efficacy are proven in both laboratory and field settings.

### TRAPPER GLUE AND MECHANICAL TRAPS

Bell has applied its vast knowledge of rodent behavior and engineering savvy into the development of an array of mechanical and adhesive trapping alternatives. Bell's glue formulations are the result of substantial research and testing to determine the ideal combination of immediate grip and stretchable hold, the two factors needed for the highest possible capture rate.

### TALPIRID MOLE BAIT AND MOLE TRAP

TALPIRID® Mole Bait is a one-of-a-kind product that was developed after years of groundbreaking research. It is the first mole bait of its type designed, developed and scientifically proven to kill moles.

TALPIRID® Mole Trap incorporates the latest in mole trap technology. Built to withstand any soil type, it is the ideal complement to a complete TALPIRID program.

### MANUFACTURING FACILITY

Bell is a vertically integrated manufacturing company. All of Bell's products are designed, tested and manufactured in its modern facility which houses its manufacturing operation, offices, and biological and chemical testing laboratories.

### ENVIRONMENTAL STEWARDSHIP

Bell continues to work with conservation groups and government agencies around the world to rid ecosystems of invasive species and restore the balance of nature.
