THE WORLD LEADER IN RODENT CONTROL TECHNOLOGY®

SUPERIOR PRODUCTS FROM THE WORLD LEADER IN RODENT CONTROL

As the world leader in rodent control technology, Bell Laboratories continues to provide leadership and stewardship for the rodent control segment of the pest control industry. Our focus is on quality, functionality and innovation.

PROTECTA TAMPER-RESISTANT BAIT STATIONS

From the toughest to most discreet baiting requirements, Bell offers PMPs a choice of versatile tamper-resistant bait stations and anchoring systems to fit any situation.

EXCEPTIONAL RODENTICIDE BAIT FORMULATIONS

Bell's rodenticides contain only the highest-grade inert ingredients for maximum results in the field. Bell's overall palatability and efficacy are unmatched in the industry.

TRAPPER GLUE AND MECHANICAL TRAPS

Bell has applied its vast knowledge of rodent behaviour and engineering savvy into the development of an array of mechanical and adhesive trapping alternatives. Bell's glue formulations are the result of substantial research and testing to determine the ideal combination of immediate grip and stretchable hold, the two factors needed for the highest possible capture rate.

MANUFACTURING FACILITY

Bell is a vertically integrated manufacturing company. Bell's products are designed, tested and manufactured in its modern facility in Madison, Wisconsin, USA which houses its manufacturing operation, offices, and biological and chemical testing laboratories.

ENVIRONMENTAL STEWARDSHIP

Bell continues to work with conservation groups and government agencies around the world to rid ecosystems of invasive species and restore the balance of nature. Learn more at: bell-labs.com/preservation-projects

What is Lumitrack?

It's a special additive that is incorporated into a rodenticide that makes the bait glow bright green when exposed to UV light. After rodents consume the bait, their faeces will glow bright green under black light.

How will I benefit from using Lumitrack?

FAST.

Lumitrack helps you quickly and easily identify droppings, especially in dark or hard-to-see conditions. Droppings can determine species type, size of the infestation, and establish high activity areas.

EFFICIENT.

Lumitrack will improve your baiting strategy. It will reveal the nesting areas and pathways of rodents which will allow you to place your bait more efficiently and skillfully in areas with the most rodent traffic.

ACCURATE.

Lumitrack aids in the early identification of an infestation. You will be able to more accurately inspect inbound pallets because the visibility of droppings will be enhanced.

FEWER CALLBACKS.
